Mirlan Nurbekov

Software engineer

I am a well-educated software engineer with strong knowledge and experience in project and event management, boasting nearly three years of working experience in an international environment as a software engineer. I am skilled in programming, building complex queries, stored procedures and functions, coordinating complex schedules, managing essential administrative tasks and projects, and facilitating effective communication across diverse cultural environments. I am fluent in English and Russian and have a strong grasp of Kyrgyz, demonstrating proficiency in translating official documents and engaging in multilingual interactions.
